

Sarah Mitchell

Senior Product Designer · Product Team · 2 years, 4 months

Acme Corp · May 24, 2026

SUMMARY

Over the past two years my role has expanded well beyond its original scope — I now own the design system, mentor two junior designers, and lead revenue-impacting projects independently. I am raising this now because recent recruiter conversations have made the gap between my compensation and market rate clear, and I would rather solve this here than let it become a retention question.

IMPACT DELIVERED

- Checkout redesign — **23% conversion increase, ~\$340K annual revenue**
- Design system migration — **saves engineering ~120 hours/quarter**
- Mentored 2 junior designers — **ramp-up time reduced from 8 to 5 weeks**

ROLE EVOLUTION

- HIRED AS**
Product designer — one product surface, no reports, no system ownership
- CURRENT SCOPE**
Senior PD — 3 surfaces, design system, 2 mentees, cross-functional lead

MARKET CONTEXT

Current \$118K Base salary	Market median \$128K Sr. PD, this market	Gap -8.5% Below median

THE ASK

PROPOSED ADJUSTMENT

\$118,000 >> \$128,000

8.5% market alignment · retention-focused correction

This adjustment brings compensation to market median for the role as it exists today — reflecting expanded scope, demonstrated revenue impact, and current external demand. This is a retention-focused correction, not a promotion request.

NEXT 12 MONTHS

Lead the mobile redesign initiative. Expand design system for international launch. Continue building the junior design team toward self-sufficiency. My trajectory is here — this adjustment ensures compensation reflects that.

I'm sharing this in writing so you have time to review before we discuss.
I'm not looking to create pressure — I want us to go into the conversation with the same information. Happy to discuss timing, structure, or alternatives.
